CREALITY × ED07

PARTNERSHIP PROPOSAL

A 3D PRINTER RESTARTED THE DREAM.

When racing nearly stopped over money, a 10-year-old asked for a 3D printer so he could make and sell his own creations. That printer is the engine of the whole ED07 story, and it could be yours.

PREPARED FOR THE CREALITY TEAM

Built, Not Given · 2026

WHO WE ARE

A RACING FAMILY THAT BUILDS, PRINTS AND SELLS TO CHASE A DREAM.

Enrique is 10 and races karts here in the UK, in the Honda Cadet 200 championship, moving up into Rotax next. His dream is Formula 1, and we build the whole journey in public under a small family media brand called **ED07**, with one idea behind it: **Built, Not Given**.

We are a Brazilian family who moved to England and decided to build the dream anyway. And when the costs almost stopped us, a 3D printer is literally what kept it alive.

"Dad, what if we bought a 3D printer? I could make things and sell them to help pay for my racing."

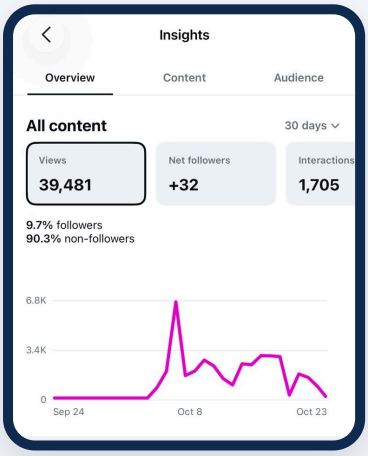

— Enrique, 10. So we did. Today he designs, prints and sells his own toys online, at school and at local fairs.

THE REACH WE BRING

199 FOLLOWERS. 25,220 PEOPLE REACHED.

Small account, serious reach. The content punches far above the size of the following, and the numbers are only climbing, so the attention is cheapest right now. These are the last 30 days on Instagram.

25,220	39,481	1,705	90%
PEOPLE REACHED	VIEWS IN 30 DAYS	INTERACTIONS	NON-FOLLOWERS REACHED

STRAIGHT FROM INSTAGRAM

Just 199 followers, but **25,220 people reached** and **39,481 views** in the last 30 days. 90% of that reach went to brand-new people, so the content keeps finding new audiences instead of circling the same one. The audience is mostly UK-based parents (51% UK, 22% Brazil, biggest group 35 to 44), an even split of women and men, exactly the families who buy printers for their kids.

And it travels further. Enrique's videos get reposted on the family's own accounts, pushing each story in front of even more people.

WHAT PEOPLE ACTUALLY WATCH

3.8K views
"The track closes. The training doesn't."

2.9K views
"F1 drivers train on this too."

2.2K views
"What's the hardest part to get right?"

2.1K views
"What's the dream, honestly?"

YOUR BRAND, IN THE RACE

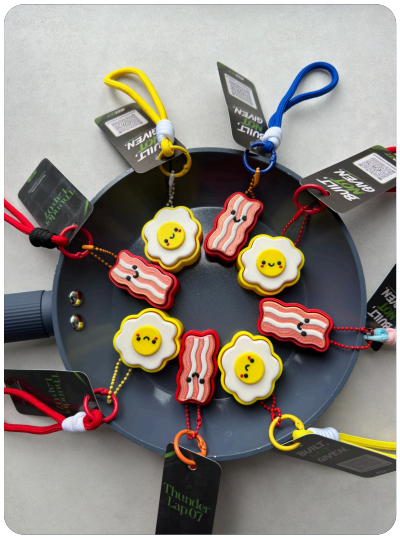

ON THE SUIT, THE KART, THE HELMET AND THE DATA. YOUR BRAND, IN THE RACE.

WHAT ENRIQUE ACTUALLY PRINTS

THE OPERATION

A real little print business, run from home. Enrique helps design, print, finish and pack the products himself.

WHAT HE MAKES

3D-printed fidget toys and keyrings, sold online, at school and at local fairs, with a small ED07 clothing range alongside.

WHY IT MATTERS TO YOU

This is not a hobby in a drawer. The printer runs most days, on camera, as the thing that funds the dream, exactly where a Creality machine belongs in the story.

THE PARTNERSHIP

WHY CREALITY.

A 3D printer is not a prop in our story, it is the turning point of it. The printer is what let a 10-year-old keep chasing Formula 1 when money said stop. We only ever show things we genuinely use, and a Creality machine at the heart of the ED07 workshop is the most honest product placement we could ever do.

WHAT WE'D CREATE.

- The printer at work, real builds and print drops
- "How Enrique funds his racing" content series
- Unboxing and first-print reel
- Instagram Reels and Stories, plus YouTube and TikTok lives (launching)

A COLLABORATION FOR THE SEASON

The simplest start: Creality supports Enrique with a printer and materials, and we feature it as the real engine of the ED07 workshop across 2027, woven into a story a growing audience is already rooting for. We are completely open to how your partnership or sponsorship process normally works, product collaboration, ambassador, or brand partner. The brands that back a story early are the ones the story remembers.

LET'S TALK

Happy to jump on a quick call whenever suits. Thank you for considering us.
